

BiWeNa

Bildungswerkstatt für nachhaltige Entwicklung
Educational workshop for sustainable development

We are an independent and non-profit educational institution in the field of ecological construction.

Our field of national activity

Fachkraft Stroh and Fachkraft Lehm

200 hour course for craftsmen according to the educational guidelines of the German Chamber of Craftsmen.

Einführung Stroh- und Lehmbau

Introductory course in clay plastering and clay construction

DIEDA

Didactics of self-organized professional training processes with digital media

Globale Bauwelten

Travelling exhibition with examples of sustainable construction methods in the countries of the global South

Fachgerechte Strohbauplanung

Training for craftsmen, architects, engineers and students

Our field of european activity

STEP Straw Bale Training for European Professionals

According the rules of the STEP program

Jump training for change

A train the trainer program in the field of ecologic building

Our rooms are not this, but this is how the training starts

This is the training room
in Verden, Lower saxony, between Hannover and Bremen

It is our area 57 where all will be happened what you expect in the field of ecological and natural building

Inside you will find the other world

Here we train the ecological innovation in straw

and clay work even it looks a little bit shi....

a storm in the brain is also needed

since more than 5 years we have the opportunity
to train more than 200 people in

smelling,

thinking,

forming,

ecological

With this idea in our hearts

A chance for the world

A chance for the world with us

A chance for the world to live in

An opportunity for the world to live with sustainable homes,

growing up with new ideas,

a world,

in which we are able to live

Thanks for joining us

Hopefully with same ideas

Erasmus+
